# Text Interpretation - HTML (advanced)

With Text Interpretation - HTML (advanced) it is possible to include HTML objects such as tables in reports. This report contains 3 formulas. The formula "Table" contains a table with 2 columns and fields with different colors in each row. The formulas "NumberedList" and "BulletList" contain numbered and bullet lists, respectively.

Different Colors in HTML table	
aqua	black
blue	fuchsia
gray	green
lime	maroon
navy	olive
purple	red
silver	teal
white	yellow

i-net Clear Reports components:
